Prometheus

Infrastructure Overview
Networked for reliability

Our platform is structured to provide our users with a high level of service reliability without compromising protection from malicious attacks.

Platform Users

Desktop users **Mobile users**

Malicious Actors

Hackers **Bots**

Internet

Cloudflare

Terabit DDoS Protection **Web App. Firewall Services** **Content Delivery Network** **API Gateway**

AWS US East 1a

Application Load Balancer

API Server with MongoDB Atlas

Serverless Fargate

AWS US East 1b

Application Load Balancer

API Server with MongoDB Atlas

Serverless Fargate

Fully IaC (Infrastructure as Code) for Consistency and Reliability

Compliance Archiving to Global Relay

Async. Replication **Integration with Users' Global Relay Archive** **API Server**
